Overview AutoCAD is both the world's most popular CAD software and one of the world's most popular applications in all of computing. As of January 2015, over 6 million copies of AutoCAD were sold. AutoCAD is a registered trademark of Autodesk, Inc. and is used on its products and services worldwide. AutoCAD is available for the PC (Windows, macOS, Linux), iPad, and Android operating systems. AutoCAD LT was formerly known as AutoCAD SP. It was first released in November 2002 as a revised version of AutoCAD Classic, a product that had launched in 1997 and was one of Autodesk's first consumer-oriented software applications for Windows. AutoCAD LT integrates and extends the capabilities of AutoCAD SP. This integration and extension comes from AutoCAD's scripting language, AutoLISP. Autodesk currently supports all AutoCAD R20 and R16 releases. History AutoCAD was originally developed by a group of programmers in San Rafael, California called "The University of San Rafael CAD Crew" in 1982. It was originally written in an assembly language called UCS-R (for UCSR). UCS-R eventually evolved into UCS-C, which was renamed UCS-P, and finally, UCS-D (short for UCS-Disassembled) in 1985. UCS-D was developed by Tim Draper and Mark Simons for the PDP-10 operating system. It was the first entirely new, disassembled CAD program written for any computer. UCS-D was renamed AutoCAD after its successful market release, and the AutoCAD design team migrated to the new program. By 1986, UCS-D was primarily used to develop the software's large database of features and symbols and for feature testing. Later, it was partially replaced by UCS-J, an enhanced version of UCS-D, with the UCS-J team developing UCS-J on top of

That's why the Founders created the United States Department of Homeland Security. As the national borders are secure for the first time since the Continental Army vanquished the British at Yorktown, America is literally, and metaphorically, a work in progress. The United States Department of Homeland Security is a federal law enforcement agency that has jurisdiction over matters related to "domestic terrorism," "public and private protection" and the "threat to national security," which, one might argue, the number one threat to our national security is the federal government itself, which is illegal, illegal, and it's illegal.
